

AITU CONNECT

is a campus-focused social media platform
designed exclusively for students of Astana IT
University

Medeubek Dinara
Toktarbekova Aruzhan
Kuanysh Bakhtiyar

https://github.com/Aruhan38/AITU_Connect

Purpose

The goal of the project is to create a centralized digital space where students can communicate, share information, join academic and social communities, and stay updated on campus life.

Unlike generic social media platforms, this **system is tailored** specifically for university needs, combining academic interaction, student communities, events, and daily-life information into a single platform.

Relevance

Situation

Currently, AITU students rely on multiple **disconnected platforms** such as Telegram, Instagram pages, informal chats to exchange information.

Problems

- Information scattered across different platforms
- No single space for clubs, canteens, announcements
- Students miss important updates
- Staff & clubs have no direct channel to students

Solution

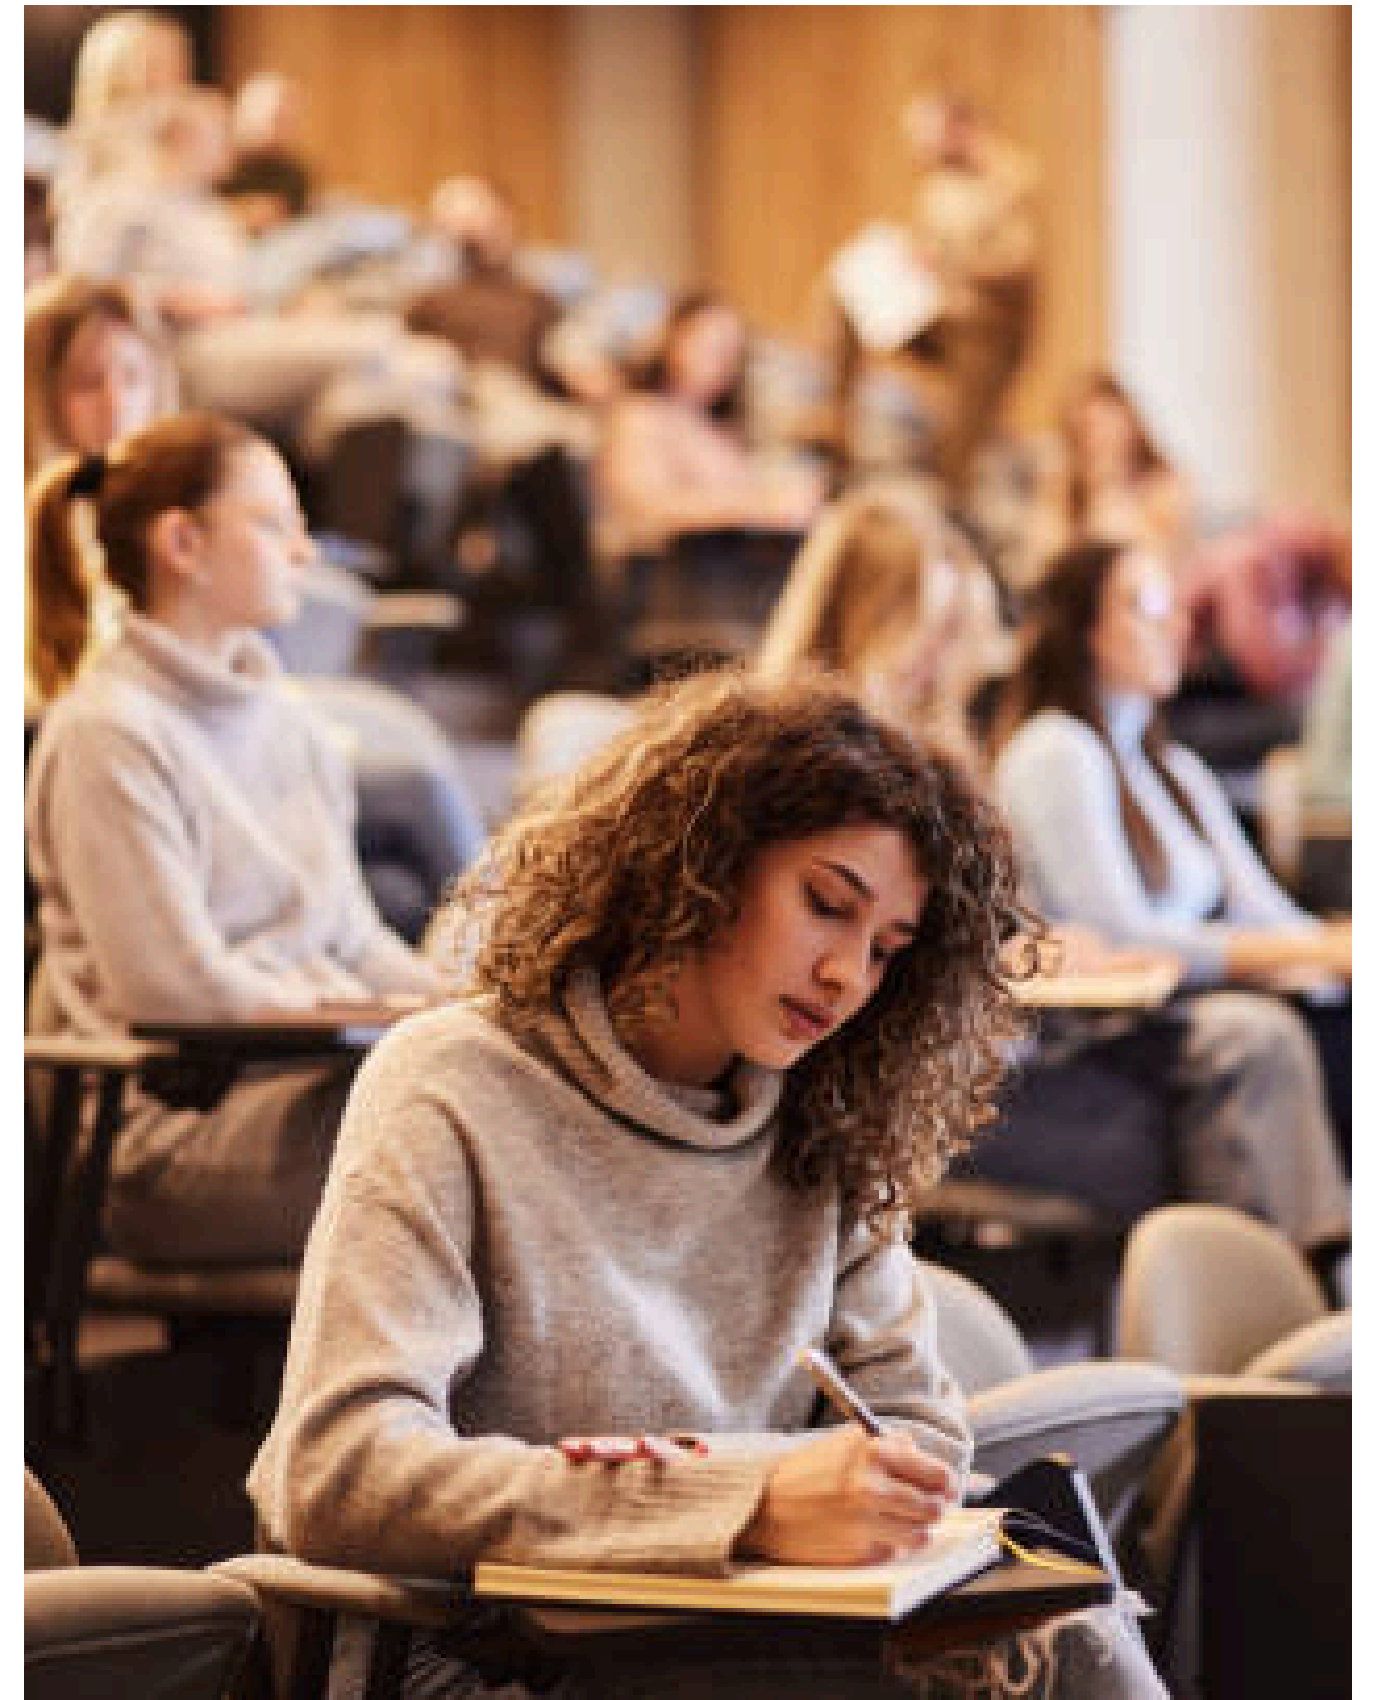

AITU Connect solves this by providing:

- One unified platform
- Role-based access for every university member
- Centralized communication and updates

Objectives

- Implement role-based communities for students, clubs, and university activities.
- Develop a secure authentication system with role-based access.
- Create a dedicated "Canteen News" module to solve the issue of unofficial campus rumors regarding food.
- Ensure a clean and maintainable project architecture implemented in Go.

Good Education to Build A Better Future

Unified campus platform with role-based access. Discover the smart way to manage your university life at Astana IT University.

[Sign in](#)[View canteens](#)[Open Campus Feed](#)[Explore Clubs](#)

Canteens

Explore all campus dining options, view menus, and find locations in real-time.

News Feed

Stay informed with the latest university announcements and student-led updates.

Clubs & Communities

Discover student clubs, follow announcements and join events across campus.

[Events](#)[Posts](#)[Community](#)

Login Page

Our system supports multiple **roles**:

- Students
- Canteen staff
- Club leaders
- Moderators
- Administrators

Each role has its own tools and permissions.

Security architecture:

- JWT authentication
- Token expiration & auto logout
- Role-Based Access Control (RBAC)
- Protected routes for admin/moderator/staff

Only authorized users can access sensitive features

Unleash Your Creativity with Art Club!

Hey AITU! 🎨 Tired of code and calculations? Come swap your keyboard for a brush! Whether you're a pro illustrator or a casual doodler, Art Club is your space to create, chill, and meet fellow creatives. What's in it for you? Weekly jam sessions & workshops. Collabs on campus projects. A perfect break from the study grind. No experience needed—just bring your imagination. Let's make the campus more colorful together! 🌈

COMPETITOR ANALYSIS

Instagram

Good for photos but lacks structured discussion and specific campus features.

LMS (Moodle)
Focused strictly on academics with no social interaction.

**ASTANA IT
UNIVERSITY**

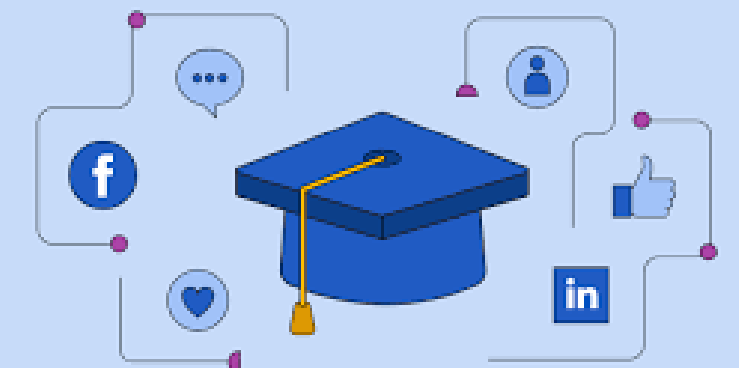

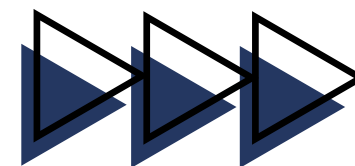

Telegram

Fast but chaotic and unstructured.

Our Advantage

Verified access, campus-specific modules,
and structured feeds

Conclusion

AITU Connect is:

- A centralized campus ecosystem
- Secure & scalable
- Designed for real university needs.

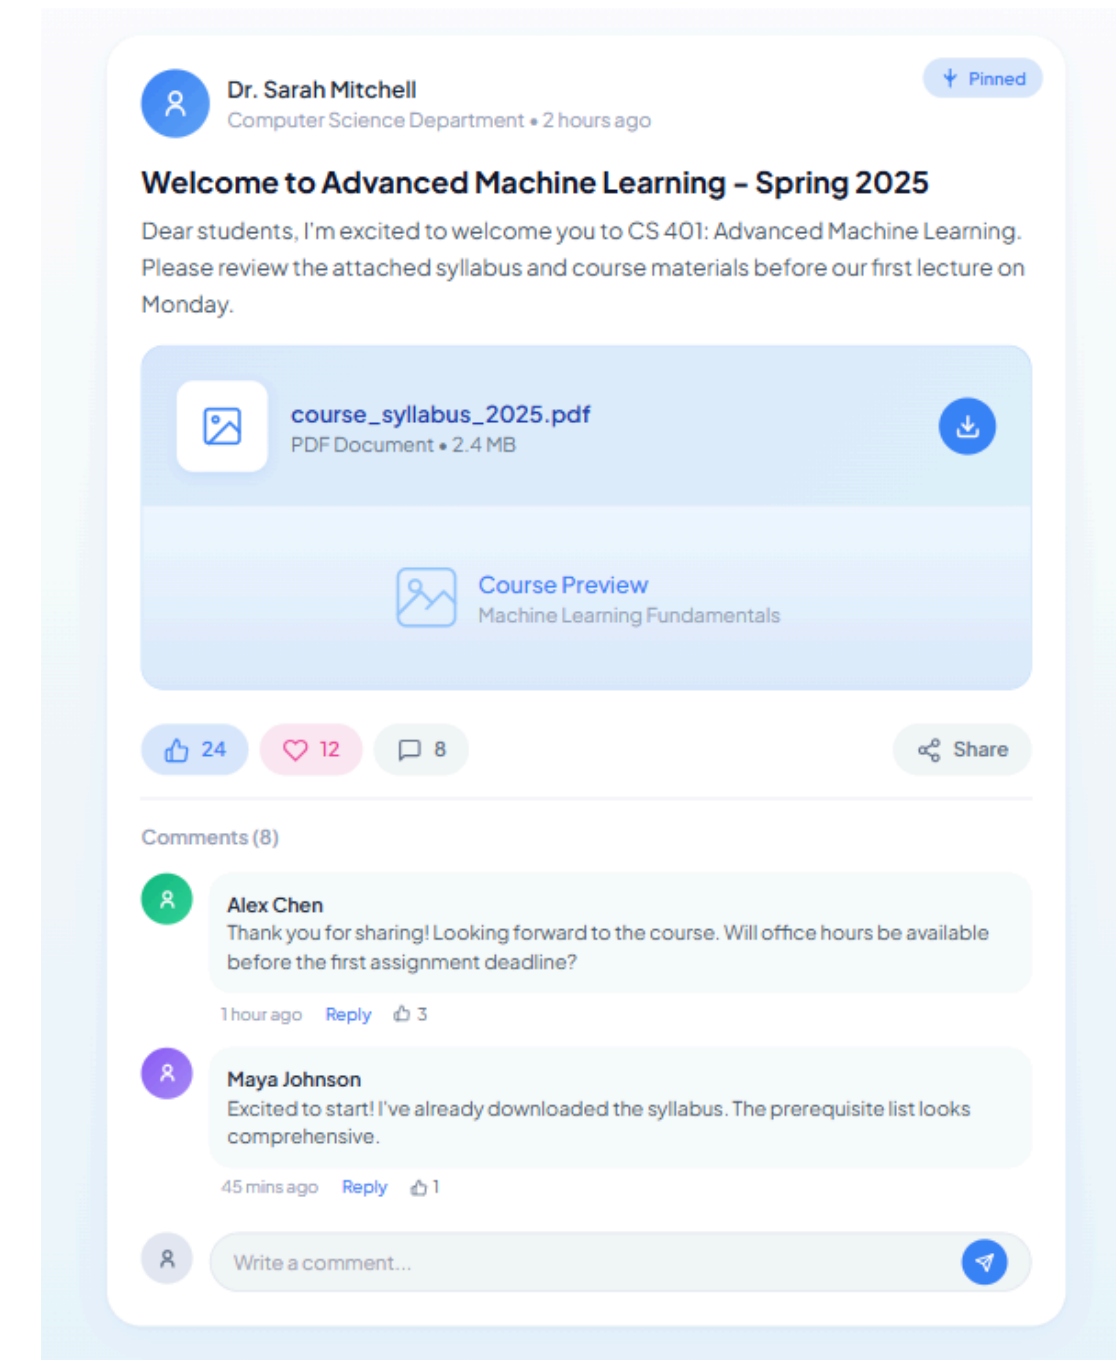

One platform. One campus. One community.

Future Development Possibilities

- Implementation of real-time private messaging and notifications.
- Development of a dedicated mobile application.
- AI-based recommendations for communities and posts.
- Extended post interaction features, including:
 1. comments and discussions under posts
 2. photo attachments and media sharing
 3. user reactions and opinions
 4. pinned and highlighted posts for important announcements

THANK YOU

For the Attention
